

Sharpen the Skills

Section	Topics
Introducing PowerBI Desktop	PowerBI overview Power BI Interface and Workflow
Working with Data	Importing from Excel Copying and pasting data Importing from Web Importing from SQL
Connecting and Shaping Data	Type of Data Connectors The Query Editor Basic Table Transformation Text Specific Tools Number Specific Tools Date Specific Tools Conditional Column Grouping and Aggregating Data Pivoting & Unpivoting Merging Queries Appending Queries Data Source Setting Query Refresh Setting Additional Data Types and Categories
Data Model Creation	Creating Table relationship Connecting Multiple Databases Defining Hierarchies
Visualization Data with Reports	The Report View Date slicers Cards and KPI's Map Visuals Tree Maps Line & Area Chart Trend Line and Forecast Cross Filtering & Highlights Create Simple Visualizations Combination Charts Slicers Map Visualizations Tables & Matrix Waterfall Gauges & Data Cards Styling the Visualizations Categories with no Data
Data Analysis Expressions (DAX)	Understanding Data Analysis Expressions Intro to Calculated Fields Intro to Measures Adding Columns and Measures Implicit vs Explicit Measures Filter Context Examples Step by Step Measures Calculations DAX syntax and operators Common DAX Functions Categories Basic Date and Time Functions Logical Functions Text Functions Joining Data with RELATED Basic Maths and Stats Functions CALCULATE function Introduction to Time Intelligence DAX
Introduction to Power BI Service	Sign up for Power BI Service Parts of the Power BI Service Datasets Reports Dashboards
Project & Assessment	
Q&A	

Duration: 3 days

Section	Topics
Introduction to Canvas Apps	<ul style="list-style-type: none"> Create an app from a template Change Sort and Filter Introduction to Forms Build an App from Excel table Build an App from SharePoint/SQL Galleries Customizing Galleries Variables Using Controls and Functions Data Sources and Interactions Customizing Screens Working with Layouts and Fields Working with Controls and Data Card Working with the Formula Bar Form interactivity and navigation
Using the Common Data Service	<ul style="list-style-type: none"> Introduction to Common Data Services for App Setup Working with an Entity Use Data
Introduction to Model Driven Apps	<ul style="list-style-type: none"> What are Model Driven Apps Create Model Driven App Features Publishing Model Driven Apps Business Process Flows
Introduction to Flow	<ul style="list-style-type: none"> What is Flow Create your first Flow Types of Flows Building different types of automated Flows Managing Approval Process Importing and Exporting Flows Monitoring and Repair
Enabling Productivity and Collaboration	<ul style="list-style-type: none"> Managing PowerApps Sharing PowerApps PowerApps Versioning Microsoft AppSource Running PowerApps PowerApps Mobile Web Browser PowerApps Admin Centre Environments
Project & Assessment	
Q&A	

Duration: 5 days

Section	Topics
Covering Basic Aspects	Tools & Tips for efficiency (Quick Access, Flash Referencing & Name Manager) Data Validation Frequently used formulas: COUNTIFS, SUMIFS, AVERAGEIFS MAXIFS, MINIFS IFS, IFERROR, LOOKUP MATCH, INDEX, VLOOKUP DATE, TIME Conditional Formatting (Heat Map, Data Bars)

Transform data with Power Query	Connecting with multiple sources Compiling multiple tables & files Cleaning & Filtering data Transforming data (Text, Date, Number) Conditional Column Merging & Appending tables Understanding Advance Editor (M)
---------------------------------	--

Visual Representation	Working with chart elements Selecting the right charts Working with combo charts Sparklines Data to ink ratio Creating dynamic data tables & charts
-----------------------	--

Pivots & more	Working with simple pivots Formatting & Calculated Field Adding dimensions with slicers Introduction to Power Pivot Data Modelling with Power Pivot Understanding Data Analysis Expressions Intro to Calculated Fields Intro to Measures Adding Columns and Measures Filter Context Examples Basic Date and Time Functions Logical Functions Text Functions Joining Data with RELATED CALCULATE
---------------	---

Project & Assessment

Q&A

Section	Topics
Understanding Data	Data Types Data Categories Data properties: <ul style="list-style-type: none">*Central Tendency*Variation Sampling
Playing with Statistics	Trend & Normality Handling outliers Quartiles & Percentiles Probability Covariance & Correlation Coefficient Regression <ul style="list-style-type: none">*Least Squares Methods*Multiple Regression*Quadratic Regression*Logistic Regression Time Series Analysis Moving Average & Exponential Smoothing
Analytical Tools & Concepts	Pareto Rule Process Mapping Histogram & Box Plots Root cause Analysis Attributes of Variation Statistical Process Control Introduction to <ul style="list-style-type: none">*Six Sigma (DMAIC)*Lean*Kaizen
Models & Simulations	What-if Analysis Simulation Modeling & Optimization Sensitivity Analysis Linear Optimization Models Non Linear Optimization Models Decision Analysis
Working with Excel	Common Excel Functions Working with Pivots Working with Charts Analysis Tool Pack Solver Add In
Project & Assessment	
Q&A	

Section	Topics
Getting Started	PowerPoint user interface The Ribbon and Backstage view Choosing a look with the Design tab
Building your content & Design	Building an outline Editing slide content Inserting & formatting inserted Creating notes pages Working with text, images, visual effects Adding and editing animations Transitions and slide sorter Design tools Applying themes to a slide show Working with text
The Slide Master	Customizing a theme in the Slide Master Editing the Slide Master Custom layout
Using Tables, Charts, and SmartArt	Transforming text into SmartArt Formatting bulleted lists as SmartArt Styling a piece of SmartArt Linking and embedding external data Linking and embedding external data Creating a linked object Creating a chart from tabular data Generating charts in PowerPoint Styling charts and graphs
Adding Graphics and Multimedia	Editing and adjusting images Creating a crossfade effect Enriching slides with sound effects Trimming and triggering sound effects Media compression and compatibility
More About Slides	Working with alignment guides Delivering presentations Setting up the slide show Controlling your presentation from the keyboard
Slideshow	Presenting in slide show preview PowerPoint's presenter view Using speaker notes Formatting and printing notes pages Going to a black or white screen Designing a printed handout Using the laser pointer and highlighter Focusing audience with the Pen tools
Project & Assessment	
Q&A	

Duration: 3 days

Advantage **VIVRAN**

- Focus on developing self-learning behavior
- Practical applications of concepts
- Learning by examples (hands-on)

Bonjour! With a work experience of 15+ years in the field of **Data Analytics, Process Simplification, Automation & Training**, VIVRAN brings a rich knowledge of designing customized solutions to simplify the decision-making process of senior leadership.
